

Metabolomics Made Easy.

High quality metabolite profiles, fast.

MoveKit™ CE has been designed from the ground up for a completely new user experience. Our kits include everything you need to turn complex metabolomics workflows into push-button science, so you can focus on biological insights, not busywork.

Save Time

Same-day deployment, 10x faster data analysis, and 30-minute sample prep with no derivatization.

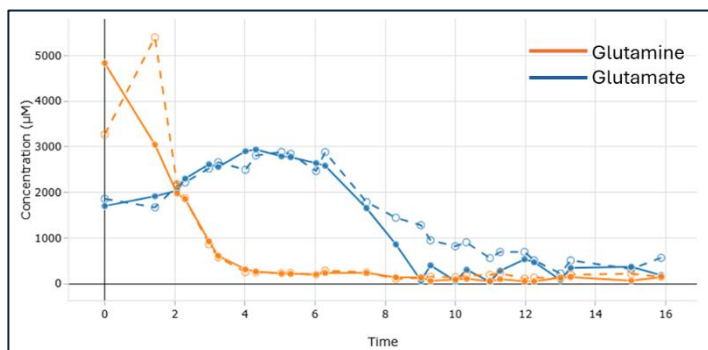

Confidence Built In

Real-time SST and data checks, stable isotope internal standards, and quantification based on external reference materials.

Deeper Insights

Hundreds of metabolites across amino acids, amines, acylcarnitines, vitamins, redox, 1-carbon metabolism, neurotransmitters, and more.

REAL RESULTS, LESS HEADACHE.

Labs using MoveKit™ CE can expect dramatic reductions in hands-on time for reliable metabolomics results. Representative results shown above for two amino acids from a CHO bioreactor.

MoveKit™ is a trademark of Move Analytical LLC. For research use only. All rights reserved. ZipChip® is a registered trademark of Repligen Corporation. Move Analytical is not affiliated with or endorsed by Repligen Corporation or Cambridge Isotope Laboratories.

WHY IT WORKS

- 5-minute experimental design with automated acquisition sequence building
- Push-button ZipChip® CE-HRMS: 12-minute runs, minimal training
- MoveApp® software automates system suitability assessment, data checks, peak assignment, quantification and reporting

WHAT IS INCLUDED

- Extraction & Prep reagents
- System Suitability Test mix
- Stable-isotope internal standards, partnering with Cambridge Isotope Labs
- Blank, Calibration and QC Samples
- MoveApp™ automation software
- Predefined library of >300 targets

PRICING & ORDERING

MoveKit™ CE (MKIT-001) – complete solution
\$5,050 (90+ samples)

MoveKit™ Standards (MKIT-002) – standards only
\$1000 (5 vials of 100 µL)

Skeptical? Good.
Let's prove it together.
